Welsh People of Coleman Make Merry in Interesting Program

Will Hold Picnic in July 3 and Whist Drive on June 23

The Cymrodorion Society held its regular meeting on Friday, June 9th. It was decided to hold a public whist drive on Friday, June 23rd, and to hold a picnic for members and their children on July 3rd. For this latter event money is being raised by a raffle for a rug very kindly donated by Mrs. E. Thomas.

Then followed the concert program. Solos were rendered by Misses Ismay Hadley and Gwen Brown, Messrs. Alf Phillips and Bert Garrett. This was interspersed by community singing, and was brought to a conclusion by a clever sketch by several of the members. Gwen Brown scintillated as the wife who knew not her own mind while Mr. Elias Jones was the husband with the master mind. Bert Garrett was the willing, but scarcely winning lover, who was overcome by the wiles of Mr. Jones (as well as Davy Jones of locker fame). Roach Cousins was the plainclothes bellhop, so necessary to the smooth action of the play.

A dance was held until midnight, with Gwen Brown, Jim Cousins and Mrs. W. Hopkins supplying the music, with the aid of Bertram Bond as caller of the steps. The evening closed with "God Save the King."

Two interesting competitions were held during the evening—one, a hat-trimming contest for men, in which a cute little creation by Madame E. Jones took the blue ribbon. An impromptu speech for women struck most of the women speechless. Mrs. E. Richards spoke on "Brattice Cloth." Mrs. Fisher on "Fishing," while Mrs. Hadley walked off with the prize with a brilliant diatribe entitled "Billiards," not forgetting the muscle building power of this healthy sport.

THELMA VINCENT WON

The mis-spelt word in last week's advertisements was "Stenographer," with the letter "o" in place of "e" in the last syllable. The ad was headed "Writting Circular Letters."

Thelma Vincent was the first to arrive at The Journal office with a copy of the paper marked with the error, at 5 p.m. Others who discovered it were Lydia Tibergian and Herbert McMullen.

This week there is a grammatical error in one of the advertisements, in order to give everyone a chance, boys and girls should mark the error and the correction on a card, and mail it or leave it at The Journal office, any time up till Monday evening. The first correct answer drawn from the box will be given 50c.

RAILWAYS PAY

ALBERTA BIG SUM

Canada's two transcontinental railways paid the government of Alberta the sum of \$5,423,000 at the first of June, as second cash payment on the purchase of the northern railways, formerly owned by the provincial government, but sold to the C.P.R. and C.N.R. for a sum exceeding \$26,000,000. The northern roads are operated jointly by the two railways.

MINERS' ASSOCIATION MEETING

At a meeting held on Sunday, June 11, W. White was re-elected for the year, by acclamation, as president. Three names were nominated for secretary, viz: D. Gillespie, (the present secretary), W. Chapman and M. Stigler. Nominations for pit committees of both mines were made, also for the hospital board. Elections will take place shortly.

CATTLE ROAMING IN TOWN

People owning cows should remember that every time cattle damage gardens they cause loss to householders, and should not complain if they have to pay fees or fines. To solve their problem of herding cattle during the day, they should hire a herd boy during the summer months to drive their cows to and from grazing land a sufficient distance from town, so that the cattle will not cause annoyance.

A C-truck 6-422 license plate, picked up, may be had by the owner calling at Red Trail Motors, Blairmore.

FERNIE FOOTBALL TEAM HERE SATURDAY, JUNE 17

There promises to be a keenly contested game at the field on Saturday. Fernie is making a strong bid to top the league. Bellevue's victory over Coleman last Saturday by a score of 2-1 makes it necessary for them to put forth extra effort to hold a place in the league standing.

The teams in the league are Blairmore, Bellevue, Coleman, Hillcrest, Coal Creek, Corbin, Fernie and Michel. 56 games are in the season's schedule, which commenced on May 13, and concludes August 19, following which three cups are to be competed for by league teams.

COAL PRODUCTION

The total coal production for the province for the month of April was 245,575 tons, a decrease of 7,875 tons from the same month of 1932.

NEW COAL RATE

A new effort to gain the Ontario coal market for Alberta coal mines will be made following the announcement of the Canadian Railway commission that an order is to be issued giving a \$3.50 per ton freight rate on the coal from Alberta points to the East.

The boys will assist in clearing the land, and it is hoped to have it ready by the time the camp opens in July.

Lethbridge Scouts have enquired about camping facilities here.

The Crows' Nest Pass district proposes to hold a "Flag Day" throughout the Pass on June 30, and July 1, to augment the funds of the district. It is hoped that all loyal citizens who wish to promote good citizenship will give their support by purchasing a flag from the boys on this occasion.

ALBERTA'S WRIGLEY SWIM

The Wrigley Swim for the province of Alberta will take place this summer, July 22nd, at Sylvan Lake, one of the largest lake resorts in Alberta, just west of Red Deer city, on a gravelled highway. In conjunction with this event, a large regatta will be held.

CONTROLLING MOTOR BOAT TRAFFIC

Special regulations controlling motor boats on lake resorts in Alberta have just been made effective by the Alberta government. These require all motor boats to be licensed, to have muffle savers in recognized races, to have proper lights, and they make provision also against the reckless or negligent operation of motor boats, and speeding save in racing.

ST. ALBAN'S CHURCH

Next Sunday is the first after Trinity. The services will be: 8 a.m. Holy Communion; 11:15 a.m. Morning prayer; 12:30 p.m. Sunday school.

COLEMAN HOMING SOCIETY

Result of race from Maple Creek to Coleman, distance 23 miles. Birds liberated 5:50 a.m. and arrived 2:45 p.m. Velocity

1st J. Anderson 763.2 yds per min.
2nd J. Claes 759.9
3rd W. Pryde 755.8
4th T. Jackson 749.1
5th A. Wilkinson 750.1
6th W. Roughhead 570
7th W. Harrison 489.8

First prize—Donated by Coleman Hardware.

Second prize—Roast, donated by Zak Meat Market.

NEWS NOTES FROM DRUMHELLER

The following from the Drumheller Mail, concerning former Colemanites, will be read with interest.

Mrs. T. Johnson and son Jack will sail from Montreal tomorrow (Friday) on the C.P. liner, "Duchess of York" for a visit to their old home in England. Mr. Johnson and his brother, Fred, accompanied Mrs. Johnson to Calgary, and then returned west to Arrow Park, in the Arrow Lakes district of British Columbia, where they will spend a month's visit with their parents.

Mr. and Mrs. W. E. G. Hall have as their guests for two weeks, Mrs. Hall's father and sister J. W. Macintosh and Mrs. O. E. Strothers, of New Glasgow, N.S.

NOBBS—REYNOLDS

The marriage of Rev. H. L. Nobbs, former priest-in-charge of St. Margaret's church, Drumheller, to Margaretine Reynolds, took place at St. Bride's church, Glasgow, Scotland, on May 9, 1932. Rev. and Mrs. Nobbs will reside at Cannontown, Argyle, Scotland, where Mr. Nobbs is rector of St. Kieran's church.

Mr. and Mrs. W. Antel were in from the North Fork over the weekend, and Mr. Antel states that cars will not be able to get within two miles of the ranger station owing to the road construction work being in progress. It will not be completed till the middle of August. Those ardent fishermen who want to get up Racehorse Creek and other streams will have to walk longer distances or use saddle-horses, as the road beyond the Gap will be blocked until repairs are completed.

Boy Scouts Will Enjoy Swimming Pool at Annual Camp

Dam on Creek Will Be Built—Permanent Site Will Be Laid Out For Scouts Annual Camps

Heads C.P.R. Hotels

A committee of the district council went to the camp site at McGillivray Creek on Tuesday evening, and with Albert Knowles, made plans for laying out the swimming pool. Those present were J. McLoaten, of Bellevue; J. Gillis, of Blairmore; Reg Jones, H. T. Hallsworth, Rev. A. S. Partington, Coleman, and District Commissioner Gresham.

The boys will assist in clearing the land, and it is hoped to have it ready by the time the camp opens in July.

Lethbridge Scouts have enquired about camping facilities here.

The Crows' Nest Pass district proposes to hold a "Flag Day" throughout the Pass on June 30, and July 1, to augment the funds of the district. It is hoped that all loyal citizens who wish to promote good citizenship will give their support by purchasing a flag from the boys on this occasion.

G. A. Vissac donated \$10 to the district fund of Crows' Nest Pass Scouts, which is acknowledged with thanks by the secretary, Rev. A. S. Partington.

The name of Isobel Atkinson was omitted from those who assisted in the program of the Brownies in the rink on May 24. She has been a valued helper in the work of training the girls.

Alex. Cornett, who was injured in an accident at Coal Creek mine, has returned to Coleman. He is using crutches, owing to having suffered a broken leg. He much prefers two legs to four.

Mr. and Mrs. Dwight Hibbert of Calgary have rented a cabin at the lake. During the summer Mr. Hibbert will cover the Pass towns for the Commercial Life Assurance Co. of Edmonton.

At a meeting of the school trustees of the High and public schools on June 9, it was decided to re-engage the staff on the revised salary schedule of 10 per cent below the schedule heretofore in force.

LOCAL AND GENERAL

Mr. E. V. Steele, district agent for Metropolitan Life Insurance Co., who resides at Blairmore, leaves this week for holiday vacation.

Reader interest is of prime importance in making a newspaper of value to advertisers. So-called 100 per cent circulation of those who claim this has proved to be incorrect, as close-up results, some papers stating they had 100 per cent circulation have been called in to refund to advertisers for being short of what they flippantly stated. It's easy to make a statement, but not so easy to back it up.

At a meeting of the school trustees of the High and public schools on June 9, it was decided to re-engage the staff on the revised salary schedule of 10 per cent below the schedule heretofore in force.

A number of young people held a surprise party on Friday evening in honor of Nori McLeod at the home of her parents, and later they visited Mr. and Mrs. C. M. Devine's house.

A meeting of the war memorial committee is called for this evening (Thursday) at 7:30 p.m. in the council chamber. Mayor Pattison is chairman of the committee, and various organizations, including the Canadian Legion, are represented.

MISS GRACE MCKINNON

Miss Grace McKinnon recently returned from Guelph, Ont., to spend the summer with her parents.

Gwen Dunlop and Olive Brown were among those who discovered the wrongly spelt word in last week's advertisements.

The interior of George Neil's furnishing store was recently re-decorated, greatly brightening the appearance.

A number of young people held a surprise party on Friday evening in honor of Nori McLeod at the home of her parents, and later they visited Mr. and Mrs. C. M. Devine's house.

A meeting of the war memorial committee is called for this evening (Thursday) at 7:30 p.m. in the council chamber. Mayor Pattison is chairman of the committee, and various organizations, including the Canadian Legion, are represented.

Fresh Every Saturday
Cookies, Cakes, and Puffed Pastry

BREAD, 5 loaves for 25c

Meat Specials—Saturday Only

Silver Fern and Clarendon Creamery Butter, both choice quality per pound 19c

Swift's Pure Pork Sausage, government stamped, 2 pounds for 25c

SERVICE QUALITY LOW PRICES

The People Must Pay.

Few, if any, subjects are engaging the attention of people in Canada, as most countries, as closely as the subject of taxation. The rising burden of taxes is a matter of deep concern to all. Fortunately, it is receiving serious consideration, not only by those responsible for the administration of public affairs, but by individual citizens.

Taxation in our modern democracies is by no means a simple problem; it is cumulative in effect, and its control is extremely difficult. Every governing and administrative body set up imposes a measure of taxation upon all of us, and, in addition, there are many calls made upon people which, while voluntary in some sense, constitute, in the final analysis, a form of taxation.

First, we have Federal taxation, direct and indirect, and levied in a great variety of ways through such agencies as the tariff, excise duties and taxes, sales taxes, income taxes, stamp taxes of various kinds. Provincial legislatures follow with a second income tax, land taxes, amusement taxes, license fees to be paid for this, that and the other almost without number. Then the municipalities place another tax on lands, on improvements thereon, some levy a third income tax, some an additional amusement tax, all of them have more license fees to charge. The school boards impose further tax to meet the costs of education.

Hospitals have to be provided for, to some extent this is done through taxation, Provincial and municipal, but often this form of taxation has to be supplemented by voluntary contributions, but, which, in reality, are a tax on business and incomes. Churches have to be maintained, even though the law may not compel us to do so, and thus people are in effect again taxed if they are willing to be, and most of them are. Philanthropic and charitable organizations and services of all kinds are maintained in the same way.

The cumulative effect is to produce an almost impossible burden, until now we find articles appearing in magazines, financial journals, the daily and weekly newspapers recording the hundreds of millions of debt that have been created, and the scores of millions that must be annually raised in taxation, while organizations of all kinds are conducting investigations and studies with a view to arriving at some means whereby the burden can be lessened, and any further increase of it prevented.

Prevention of any further increase is an easy matter if the people, who are the sufferers, determine there shall be no further increase. Individuals know they must keep within their incomes, or they are headed for trouble and disaster. Private business knows it must accommodate itself to its income, or it will end in bankruptcy. What individuals and business must realize is that what is true in their respective cases is likewise true in public business.

Many people, possibly a majority of them, who are fully aware that they must live within their incomes, have nevertheless acted in the belief that it was not necessary for the governing bodies created by them, and supported by them, to follow the same course. Rather, people have insisted that their governments, Federal, Provincial, Municipal, should provide this and that service, and as the people make and manage governments, the latter have naturally done what their creators demanded they should do. But these same governments have no income except the power to tax people, and this they have proceeded to do.

What people must realize is that if they demand of their governments certain services they must be prepared to pay for those services. They cannot have them otherwise. And if they cannot afford to pay for them, then there is only one thing they can do, and must be prepared to do, and that is go without them. That is, in their capacity they must govern themselves by exactly the same rules as they are forced to recognize and obey as individuals. If they cannot pay they must be prepared to do without what they would like to have and would have if they could afford it.

It is being predicted that the worst of the depression of the last three or four years is over; that things are once again on the up-grade; that better times are slowly but surely developing; that, in a word, the world is beginning to turn that corner from which it has been said prosperity is lurking. Let us all hope so. But when we have reached and turned that corner, and we are once again tempted to demand something of our governments we would like to have, and think they ought to supply, it will be the part of wisdom to pause and consider whether, after all, we can afford to have it, because, no matter what it may be, it will have to be paid for, and paid for by us—the people—and paid through the medium of taxes in one form or another.

Many glowing promises are frequently made, and are still being made notwithstanding the bitter experience of the past few years, of what the State can, and ought, and will do for all the people if certain principles in administration are adopted. But if these wonderful things are done, the people will pay for them in taxes. And every dollar that people have to pay in taxes is just a dollar less left in their own pockets to spend in meeting their individual tastes and desires and needs. Either they are going to do certain things for themselves as they desire to do them, and pay for them themselves, or they are going to have the State do these things for them, as the State may determine they should be done, and then pay the State in taxes for the services so rendered.

In any event, and under all circumstances, the people will do the paying. They, too, can do the ordering. They can order beyond their means, and get into trouble. They can order for themselves, according to their own needs and desires, and pay for what they order. Or they can order the State to do the ordering as the State may see fit to do, and then pay the bills incurred by the State. And the decision, whatever it may be, will be the decision of each and every man acting in his or her capacity as an individual free citizen.

The main point to remember is that there is, notwithstanding the mistaken use of the word, nothing free in this world. Everything has to be paid for, and it is the people who have to foot the bills. Therefore, the day and the manner of settlement should always be kept in mind before the liability, whatever it may be, is incurred.

Colonization Plans

Calgary Families To Be Settled On Land In The North

Under a plan proposed to Calgary city council by Rev. O. P. Brown, president of the Land Association of Calgary, 30 families on unemployed relief in Calgary would be settled on the land at St. Paul de Metis, north of Edmonton.

The 30 families have made application for the transfer and efforts to bring them under the Dominion Government back-to-the-land scheme are being made, so the colonization scheme can go through.

Sixty per cent. of the public school buildings now used in the United States are one-room structures.

Not Open To Challenge

United States Fleet Has Perfect Right In Pacific

There is no good reason why Japan should become excited because the United States fleet is being ordered to remain in the Pacific till July, 1934; still less for supposing that the presence of the fleet in these waters is "a veiled threat." Inasmuch as the United States owns Alaska, the Philippines, and Honolulu, and as her continental territory with a Pacific seaboard extends over 18 degrees of latitude, from Juan de Fuca Strait to San Diego, the movement of her fleet in these waters is open to no kind of challenge—Australasian.

Nearly 8,000,000 spindles are being operated in textile plants in Japan.

Her Heart Was Weak Nerves Shaky, Nights Restless

Mrs. A. Black, Wallaceburg, Ont., writes:

"I suffered from heart weakness, shaky nerves, and restless nights."

I had young replacement for Milburn's Heart and Nerve Pills and decided to try them although I did not have much faith, but now I am very thankful I did as they have proved of wonderful help to me.

I am now strong and well again, but am never without a box in the house."

Scientific World Is Reserving Judgment

As To Whether Living Bacteria Is Found In Meteorites

No successful refutation has yet been put forward of the claim of Professor Charles B. Lipman of the University of California that he has found living bacteria in meteorites, according to Professor F. E. Lloyd, of McGill University, president of the Royal Society of Canada.

While making it clear that he was not committing himself to support of Professor Lipman's theory, Professor Lloyd, who has been in communication with the California scientist, declares that all who know Professor Lipman recognize in him a careful and exact observer who is not given to rushing into half-baked theories. Professor Lloyd declared that Lipman's account seems to indicate that he had taken every precaution he could think of to guard against the accidental transplanting of bacteria into his samples.

The McGill professor also informed The Toronto Star Weekly that an earlier theory of Professor Lipman announcing discovery of living bacteria in meteorites is supported by German scientist, who working independently, came to the same conclusions as Professor Lipman.

Like Professor Lipman, the scientific world is still withholding judgment on both cases, although Professor Lipman's announcement as to meteorites is criticized by some who assert that the bacteria must have got into the meteors after they had reached the earth.

Harnessing Sun Power

May Supersede Water Power As A Source Of Energy

Opening ceremonies of the fifth Pacific Science Congress at Vancouver were featured by the radio address of Lord Rutherford, famous English scientist, who working independently, came to the same conclusions as Professor Lipman.

Lord Rutherford, the scientific world is still withholding judgment on both cases, although Professor Lipman's announcement as to meteorites is criticized by some who assert that the bacteria must have got into the meteors after they had reached the earth.

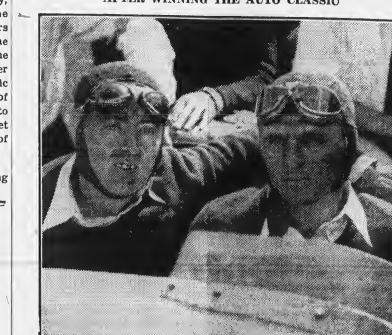

Harnessing the sun's power may supersede water power as a source of energy in the future if large scale development of a power plant at the Smithsonian Institute, Washington, D.C., proves practical. Dr. C. G. Abbott, secretary of the institute, indicated.

Dr. W. S. Adams, director of the Mount Wilson Observatory, California, outlined his theory that sun spots occur in regular cycles of 12 years. At present, the sun is comparatively exposed to the earth, he said. Dr. Adams discounted any connection between weather on the earth and sun spots.

The annual crop of icebergs from the Greenland glaciers is about 15,000.

A diamond, when chemically pure, is composed solely of the element carbon.

AFTER WINNING THE AUTO CLASSIC

Louis Meyer (right) winner of the 500-mile Memorial Day classic at the Indianapolis Speedway, pictured with his mechanic in their car just after the finish of the grueling race. Meyer, whose victory marks his second triumph in the big event, set a new record for the contest.

Captured Bandit

Sought for years as the last of the powerful Corsican bandit chiefs, Andre Spada (above) recently surrendered to the authorities at Ajaccio, Corsica, where he appeared in rags with a crown upon his head. Authorities believe the bandit leader's mind is deranged.

Britain Wants Empire Products

Plan To Have Empire Ham and Bacon Plainly Marked

A standing committee established by the British Minister of Agriculture recommended that a marking order be applied to all imported bacon and ham. This means if the committee's recommendation is adopted all foreign ham and bacon will bear the mark "foreign" and all such products from the Empire will bear the mark "Empire" with the name of the country of origin in addition.

Canadian ham and bacon thus would be marked Canada and Empire "block lettering not less than three-quarters of an inch high."

"We are satisfied," the committee reported, "that in absence of adequate marking there are obvious opportunities for substitution of imported bacon and ham and that this fact in itself constitutes a strong reason why the public should give protection and assistance while a marking order alone could give, and the honest retailer give protection against reversal."

"It was suggested that as result of progress made during the past year or two, there is now quite definitely an increasing desire on the part of the public to purchase home or Empire produce as against foreign produce and that, in order to meet this demand in regard to bacon and ham, a marking order is necessary."

More than 90 per cent. of British imports of bacon and approximately 80 per cent. of ham imports were of foreign origin in 1932. Of the former, Denmark supplied 67 per cent. and of the latter the United States supplied 58 per cent. Empire supplies have been almost negligible in the case of bacon and such supplies as reached the British market came mainly from Canada and the Irish Free State, whose proportions were 1.6 and 1.8 per cent. respectively. In the case of ham Canada supplied 17.8 and the Free State 1.9 per cent.

Portraits Of His Majesty

Five portraits of His Majesty the King were presented to Inspector Sandy Wunch, of the Royal Canadian Mounted Police, by Miss M. E. Mackenzie, regent of the Municipal Chapter of Montreal, L.O.D.E. These portraits are intended for five detachments of the Eastern Arctic sub-division of the R.C.M.P.

Daring Burglar Still Is Puzzling Detectives

"Gimlet" Jimmy Reported To Have Made \$100,000 In Clueless Robberies

"Gimlet" Jimmy, the most daring—and elusive—burglar in England, whom detectives have been trying to capture for 11 years, carried out two robberies involving £1,300 in cash, early on a recent morning with lightning swiftness.

The problem facing the police in their hunt for Jimmy is that they have no notion of his appearance.

Nor has he ever left behind him a single glint which, in the event of his capture, would definitely establish his identity with his previous crimes.

Only once has a glimpse been caught of him. That was seven years ago when, in carrying out the greatest coup of his career—the raiding of a Deansgate, Manchester, bank—the night watchman saw Jimmy for a fleeting instant as he ran past a door in making his escape.

But Jimmy, who nearly always confines his activities to the north of England, has one invariable method of approach.

For weeks he watches and learns the habits of his intended victim, usually a wealthy shopkeeper.

Then comes the night when Jimmy begins work.

First a visit to his victim's house for the keys of the shop and any valuables in the safe house.

Afterwards, armed with the keys, there is the raid on the shop.

On the latest occasion, Jimmy entered the home of W. Smith, of Ashton-on-Mersey, and, without waking the owner, took a bunch of keys from the bedside and opened a safe in the house, from which he took £300.

Half an hour later Jimmy had taken another £1,000 from the safe of Mr. Smith's shop in Gorton.

Jimmy, whose name of "Gimlet" comes from his peculiar method of entering a house through a window, is estimated to have secured more than £100,000 by his burglaries.

A Long Session

Last Session Of Parliament Extended Over 232 Days

The session of Parliament just closed extended over 232 days including the adjournment from November 25, 1932, to January 30, 1933. Only two sessions since Confederation in 1867 have been longer, the longest being the third session of the 11th Parliament which was from November 17, 1910, to July 29, 1911, or 255 days. The next longest was the seventh session of the 12th Parliament, which sat from January 18, to September 20, 1917, or 246 days. The third session of the fifth Parliament sat from January 29 to July 20, 1885, or 173 days. The shortest session was the fourth of the 12th Parliament which met on August 18, 1914, and prorogued on the 22nd of the same month. Those five days, however, were among the most momentous in Canada's history for in that brief time the Dominion decided on the policy to be adopted in connection with the Great War.

British Built Aircraft

Have Been Granted An Official Distinctive Mark

British-built aircraft have been granted an official distinguishing mark—a lion rampant in gold within three rings of red, white and blue. Within the white ring are inscribed the words, "British Certificate of Airworthiness." The mark has been registered under the Trade Marks Act.

The air ministry announcement of the new mark, which will at once distinguish British-built flying machines, no matter what nation's registration markings they bear, states that the mark is authorized to apply to any aircraft, whether lighter or heavier than air. No fee is required for the authorization.

The first aircraft mark authorized was affixed at the London air station, Croydon, to "Astrea," one of the Imperial Airways fleet.

One Kind Of Deal

Angus—I've made a big deal. I traded that old horse of mine for a load of hay.

Sandy—What's the good of the hay if you haven't got a horse?

Angus—The man's going to lend me the horse long enough to eat up the hay.

The parrots, tortoise, reptiles and birds of prey are found to be the longest lived inmates of the London zoo.

All the gold mined in the world since Columbus discovered America, would amount to about \$22,413,000.

Put Ogden's Cut Plug in your pipe and join the parade Step along with those who've discovered the pleasure that only Ogden's Cut Plug can give to a pipe smoker.

There's only one way to prove that Ogden's Cut Plug is the kind of tobacco you're looking for—put it in your pipe and smoke it!

OGDEN'S CUT PLUG

If you "roll your own", use Ogden's fine cut cigarette tobacco and Chantecleer cigarette papers

Not Affected By Depression

New Zealand Has Steadily Increased Volume Of Exports

The effects of the depression upon New Zealand have been to some extent modified by the success of efforts counter-balance falling prices by increasing production. While other countries have been affected by rapid contraction of their export trade, in volume as well as in value, New Zealand steadily increased the volume of her exports. In 1928 exports were 12 per cent greater than in 1926; the official estimate for 1931 show an increase of 20 per cent in five years, and the volume must have been again substantially greater in 1932, for in spite of a much lower range of prices, the total value was larger than in 1931—Auckland News.

"Jones Minor, your father helped you with this essay?"

"Yes, sir."

"Did he write it all?"

"No, sir. I helped him. I corrected his spelling mistakes."

At the present rate of ice recession, the glaciers of Mount Rainier National Park probably will disappear in a few thousand years.

"In these bad times you can still travel first-class?"

"I have to. I meet my creditors in the third class."

Hang it in your kitchen. Pull out one sheet of Waxed Paper at a time.

World Economic Conference Is Opened By His Majesty The King

London, Eng.—Before a silver and gold microphone the king, Monday afternoon, formally inaugurated the greatest prosperity conference in history. Wireless waves carried his words to the furthest recesses of the earth. Special wires were used to transmit it for speedy reproduction by gramophone records.

Standing before his majesty in the conference hall were representatives of 66 nations, some cheerfully optimistic, some hesitating, some plainly skeptical. For the task of the world economic conference is to rescue a distressed world from the greatest slump it has ever known.

Thirty million workers are unemployed. More shipping lies rusting in port than was sunk during the Great War. Scarcely a national budget balances. Government has lied with government in high and higher tariffs. More than 40 countries have exchange restrictions limiting purchases of their nationals abroad. International trade has fallen more since 1929 than it has ever before.

The task of the conference is by monetary and economic policies to set the wheels of trade revolving again. It will consider currencies, prices, establishment of a new international gold standard, removal of exchange restrictions, general lowering of tariffs. Over the nature of the main problem to be solved there is little difference of opinion among the various delegations. The difficulties will come when the remedies are proposed. Sellers are many and buyers few.

With the arrival of American banking, financial and economic officials and experts, the keenest interest was aroused in world financial quarters over a possible solution of what London economic quarters call the American monetary policy.

A drop this week in the dollar exchange has re-emphasized the vital implications in world financial affairs of the eventual stabilization of the dollar.

De facto stabilization is being strongly urged as a prime objective. Oliver M. W. Sprague, assistant of the treasury, has said that currency stabilization is more a matter of stabilization of international conditions than of international agreement.

Secretary of State Cordell Hull, chief of the United States delegation, has pointed out that exchange stabilization is only one step in the solution of world economic problems and unaccompanied by the removal of trade barriers can not succeed in restoring world trade.

Nevertheless, tariff experts doubt any progress can be made in readjustments in that field without the achievement of comparative currency stabilization first.

For Lower Tariffs

President Roosevelt Hopeful Outcome Of Conference

Washington.—President Roosevelt is hopeful of a general tariff agreement to lower or lower tariff rates in accordance with prospective treaties.

If a general tariff understanding is reached at London, he intends to negotiate thereafter bilateral treaties dealing with the subject with individual nations. These treaties will be submitted to the next session of Congress for ratification.

As outlined in his campaign, the president hopes to bring about a lowering of tariff walls in an endeavor to stimulate trade.

Meanwhile, the president has control over the tariff situation through the power given him under existing laws to raise or lower rates by 50 per cent. upon recommendation of the tariff commission.

No War Debt Debate

Discussion At Conference Banned Says U.S. Secretary Of State

Plymouth, Eng.—Secretary of State Cordell Hull barred all discussion of the war debts at the world economic conference when he arrived at the head of the American delegation aboard the liner "President Roosevelt."

"We shall not go outside the details of the agenda," Mr. Hull said, "and we shall not discuss Britain's payment of war debts to the United States."

"I can emphatically say that the war debts will not be discussed by us all at this conference."

"The question of disarmament will also be outside the scope of the conference," Mr. Hull continued, "for that which concerns Mr. Davis (Norman H. Davis, American representative at Geneva), and officials at Washington."

Best Form Of Government

Present System Best Yet Devised, Says Stevens

Vancouver, B.C.—"Whatever its shortcomings, I believe our present form of government is the best yet devised by man," declared Hon. H. H. Stevens, Federal Minister of Trade and Commerce, addressing service club men here. His subject was "Stability or Experimentation in Government."

Mr. Stevens also asserted that the Canadian banking system had stood the strain of chaotic conditions during the past few years.

Germany Declares A Moratorium On Foreign Indebtedness

Berlin, Germany—Germany has declared a moratorium on credits granted to the reich before July, 1931, thus admitting her inability to pay in foreign currencies either the interest or the amortization charges on some 17,300,000,000 marks (currently \$4,824,000,000) of foreign indebtedness.

The moratorium will operate for the debts owed to foreign treasures. Existing standstill agreements with private creditors abroad are not affected.

Announcement of the truce on foreign payments was made by Dr. Hjalmar Schacht, president of the Reichsbank, who at the same time solemnly warned the world against taking retaliatory measures.

In a drastic move to revive the country's finances, the government decreed a suspension of all foreign currency payments on debts incurred prior to July, 1931, the time of the acute crisis in European finance. The suspension will go into effect July 1.

Included in the moratorium are service charges on the Dawes and Young loans, millions of which have been disposed of in other countries and represent items on certain international excise taxes.

The United States treasury is held by the suspension. The obligations due to the American military

occupation were to run until 1960, while the mixed claims account was to extend until 1981. The total of the two payments due this year is 66,000,000 marks.

The standstill agreement which amounts roughly to 3,700,000,000 marks, is unaffected at present, but a meeting of its participants at London, England, June 13, when the Bank of International Settlements will also take part, is expected to be the occasion for a review of the situation. The Germans are expecting to obtain relief from some of their obligations at this meeting.

Generally, all long term bonds floated by the government privately will go unpaid so far as the transferring of foreign currencies is concerned. German debtors will pay the regular equivalent to the conversion office which will be supervised by the Reichsbank until improved conditions permit conversion into foreign currencies.

Dr. Schacht, in an effort to silly reports that the government would use the money temporarily frozen in Germany to solve unemployment, said money collected by the conversion office will not be placed at the disposal of the government for foreign uses.

"The money remains at the disposal of foreign creditors until we can resume payments," he said.

Favors State-Owned Armament Factories

Private Manufacture Should Be Abolished Is Canada's Stand

Geneva, Switzerland—Canada is convinced the manufacture of arms should eventually be restricted to state-owned establishments, the disarmament conference has been advised.

This stand was announced by Dr. W. A. Riddell, Canadian representative, in answering a question put to all governments as to whether the private manufacture of arms should be abolished.

Great Britain, Germany and Japan opposed the abolition of private armament factories and announced themselves in favor of control.

Dr. Riddell asserted that Canada believes eventual state ownership is necessary in order to remove one of the dangerous factors in international relations, manufacture of arms and the trade in arms.

He declared that Canada regards

the internationalization of the manufacture of arms as wholly impractical.

Fewer Unemployed

Decline In Registered Idle Is Reported In England

London, Eng.—Ministry of Labor figures reveal 114,755 fewer unemployed registered on May 22 than the previous month. The decline in numbers of registered unemployed from the same date a year ago was 158,427. In four months the number has been reduced by 320,186.

The improvement in May extended almost every industry. It was most marked in building, public works contracting, brick and tile manufacture, the iron, steel, and engineering industries, metal goods manufacturing, shipbuilding and ship repairing, textiles and clothing, boots and shoes, pottery, the distributive industries and dock and harbor services.

"We shall not go outside the details of the agenda," Mr. Hull said, "and we shall not discuss Britain's payment of war debts to the United States."

"I can emphatically say that the war debts will not be discussed by us all at this conference."

"The question of disarmament will also be outside the scope of the conference," Mr. Hull continued, "for that which concerns Mr. Davis (Norman H. Davis, American representative at Geneva), and officials at Washington."

Take Drastic Measures

Endeavor To Make League Policy Effective In Manchukuo

Geneva.—Drastic measures to make effective the League of Nations policy of refusing recognition to the new state of Manchukuo, established in Manchuria with the assistance of the Japanese, were set forth in a report adopted by the league advisory committee on the Far-Eastern question.

The report set forth that Manchukuo may be excluded from international conventions, such as those dealing with postal questions, aerial questions, chemistry, weights and measures, sanitation, opium, and the Red Cross.

Better Outlook

Windsor, Ont.—Premier J. E. Winsloe, of Alberta, stopped here for a few minutes and expressed "sincere optimism" over the business outlook in the west. Business in Western Canada was greatly improved, he said, and business men were most hopeful for the future.

Scope To Be Limited

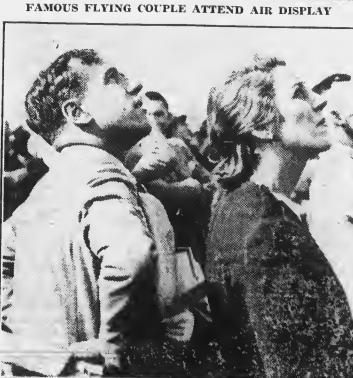

Ottawa, Ont.—Reorganization of economic and scientific research units within the empire, with the cost borne pro-rata by the member dominions, is recommended in the report of the imperial committee on economic consultation and co-operation, made

public.

Canadian Poet Honored

Cobalt, Ont.—In a simple ceremony of quiet dignity, the memory of Canada's famous habitant poet was honored at Kerr Lake when the Earl of Bessborough, Governor-General of Canada and patron of the arts, unveiled the bronze plaque which recalls to the mind of the passer-by that here Dr. William Henry Drury "Mined—Wrote—Died."

FAMOUS FLYING COUPLE ATTEND AIR DISPLAY

Almost on the eve of their flight across the Atlantic to New York in a big bid for laurels, Mr. and Mrs. James A. Molaison are shown interested in a display at the annual civil air display at Brooklands, England. Captain Molaison and his wife, former Amy Johnson, attempted to take off on their Atlantic trip, but their airplane crashed when the under-carriage collapsed. Repairs will delay their departure.

DELEGATE TO CONFERENCE

Peter Veregin Held At Winnipeg By Immigration Officials

Upturn In Business

Sir Thomas White Sees Every Sign Of Improvement

Toronto, Ont.—"I am happy to say from wide and reliable sources of information that within the past few weeks there has been marked improvement. There is a much more hopeful sentiment prevailing and a new light of hope in the faces of men," said Sir Thomas White, noted financier and former minister of finance, addressing the final meeting of the Canadian Manufacturers' Association convention here.

"Unquestionably in the United States, with whose prosperity our own is always closely connected, and in Canada, there are higher prices, increasing employment and better business generally. The wheels of our great manufacturing plants are beginning to turn with accelerated speed."

Coupled with his words of optimism, however, was a solemn warning. "I trust," he said, "the recent sudden upturn in prices and in business generally on this continent will not adversely affect the success of the world conference. The danger is that the conclusion may be reached, now that better conditions are to be looked for that there is not the same need for international co-operation."

Winnipeg, Man.—Possible deportation of Peter Veregin, spiritual and temporal leader of 16,000 Canadian Doukhobors, Friday night was overshadowed in his arrest and detention by immigration officials on a warrant issued by Hon. Wesley A. Gordon, Minister of Immigration.

Ball was refused the chieftain by Commissioner of Immigration C. E. S. Smith, pending a forthcoming hearing here, and no details of the case were available in the face of refusals from officials to discuss the matter.

Arrested in a Young Street apartment house after he had been in the city for some days, Veregin spent the afternoon in consultation with his lawyers, who had no statement of the case.

According to a judgment of the supreme court of Canada handed down in March, Veregin is still subject to deportation in spite of the decision of Mr. Justice Humphrey Meallish of the Nova Scotia supreme court halting the leader's deportation last January. He had been released from Prince Albert jail after serving less than six months of an 18 month sentence for perjury.

Empire Marketing Board

Scope Of Work Is To Be Considerably Narrowed

Ottawa, Ont.—Reorganization of economic and scientific research units within the empire with the cost borne pro-rata by the member dominions, is recommended in the report of the imperial committee on economic consultation and co-operation, made public here.

The empire marketing board, set up by the United Kingdom government in 1926, in lieu of empire preferences which that government would not grant at that time, will have its scope considerably narrowed, the conditions prompting its establishment having disappeared with the granting of reciprocal preferences at the imperial conference last summer.

The board will continue to operate until the end of September next, and will then disappear as such.

Crude Oil Rates

Regina, Sask.—Saskatchewan's Independent Oil Refineries and the provincial government, may send a freight representative to St. Louis to fight the proposed increase in freight on crude oil entering Saskatchewan from Oklahoma and Texas. A delegation from various points in the province, waited on the cabinet urging that such action be taken. An application of the Saskatchewan Freight Association is slated for hearing before the southwest freight bureau in St. Louis on June 20.

Awarded Scholarships

Montreal, Que.—Norman Leslie Wilson, formerly of University of Saskatchewan, and Vladimir J. Okulitch, formerly of University of British Columbia, have been awarded the Adams scholarships in geological sciences, it has been announced at McGill University. Both students will receive \$300.

In this uncertain atmosphere the formal discussions of arms limitation and reduction were adjourned until July 3.

The attack upon the naval accord, reached in London in 1930 by Great Britain, United States and Japan, drew sharp protests from the British and American delegations and from Arthur Henderson, president of the Cneva parley and British Foreign Secretary when the agreement was concluded.

The Tokyo delegate, Ambassador Naotake Sato, was asked to reconsider his stand against prohibition of aerial bombing as long as other great powers possess warships which pro-

vide landing and launching decks for aircraft.

"The London treaty," Mr. Sato told the conference, which was surprised at his intervention in this manner, "should have brought appeasement to all the signatories."

"On the contrary, it has created an atmosphere of uncertainty and apprehension."

"From one side and another, inflammatory speeches which were not calculated to appease the spirit of the interested peoples, have followed the conclusion of this treaty. Therefore, the feeling of security has not been strengthened."

Japan, Mr. Sato said, agreed to the French thesis that all armaments are interdependent, and will, therefore, maintain her position unless means are found for affording complete security and overcoming her apprehensions.

NOTES AND COMMENTS

GREAT BRITAIN is the centre of world interest with the World Economic Conference in progress. Distinguished representatives of many nations are extended a welcome and message of goodwill by King George, who with appropriate dignity opens a parley which millions hope will show a way to brighter international relationships in trade and commerce.

NOTEWORTHY though the King's message may be, equally important is that of the Archbishop of Canterbury, who states:

"It is not enough that there should be at the disposal of the conference an abundance of expert knowledge. What matters most is the spirit with which the problems before them are approached and considered—the spirit of wisdom which will discern through the multitude of opinions the right decisions, the spirit of courage which will bring readiness to take risks in carrying these decisions into effect, above all the spirit of unity which will bind all together in good will and in a common determination not to part without taking definite steps toward establishment of peace and prosperity among all nations."

BLAIRMORE was this week host to a large number of golf players from Lethbridge and towns west to Cranbrook. The hospitality was appreciated, as well as the prizes donated by business men who co-operated with the golf club to make the gathering a success. Events such as these keep a town on the map of enterprise and goodwill, which always remain a pleasant memory in the minds of visitors.

BOY SCOUTS of Crows Nest Pass district will hold their annual camp near Coleman, in July. This movement receives support from people, in many countries, who know that boys are trained to become useful citizens by becoming "good Scouts." Business men of Coleman and other Pass towns well might give their moral and financial support towards the good work carried on by the council. Color, race or creed makes no difference to membership in the Scouts. The Scout law embraces all who are striving for higher ideals, keeping foremost in mind that every day should see a good deed performed.

THE POUND sterling continues to rise, indicating a return of confidence and improved business conditions. Fear has ruled the world, but is giving place to renewed confidence. We are accustoming ourselves to changed conditions, and the upward trend, however slight, will help to impress people that as our difficulties have been created by man alone, so must man find a way out. The law of the survival of the fittest prevails, a natural law which cannot be ignored; despite social legislation and other panaceas proposed by idealists long on theory but short on practical solutions.

"GO TO THE ANT, thou sluggard, and be wise." Many might heed this advice from the Book of Proverbs, for the industry of this small insect furnishes a mighty good object lesson to those who imagine they can do a day's work by starting any time that may suit them before noon. So—"early to bed, early to rise; work like heck and advertise," is the modern version of the oft-quoted sentence beginning this paragraph.

SUCCESSFUL NEWSPAPERS are those which strive to give service to every phase of community life. Much time and energy is expended which does not receive the same measure of reward for the same amount of energy expended in many other lines of business. Yet throughout good times and bad, worth-while newspapers of the country continue to serve the public, even though for a considerable time many have been on the "red" side of the ledger.

KING COAL declines to abdicate, states the Christian Science Monitor. While many are of the opinion that hydro electric power is displacing coal, it is found that coal is still the backbone of steam electric generation. The Monitor states large-scale water power development generally costs more in investment for a given plant capacity than does steam electric power production. The large steam plant still dominates electric power production in most sections of the United States. In 1932 21,905,581 kilowatts was produced by steam in public utility fuel burning plants, against 8,773,051 in hydro plants.

STONEBORD means Fireproof. Absolute protection plus Insulation against heat or cold. Damp proof and harder, a wall surface that resists scuffing and takes all finishes. Will outlast any other wall-board made, costs less. In stock at J.S. D'APPOLONIA.

Here and There

What is probably the world's farthest north golf course is located at Chesterfield Inlet on the northern shores of Hudson Bay in lands which are owned by only four members and the fee which entitles the player to life membership, is ten polar bear teeth.

An increase of over half a million head in the number of cattle on farms is recorded in a report on agriculture in Canada for 1931 just issued by the Canadian Government Bureau of Statistics, with 8,511,000 head, compared with 7,991,000 in 1931.

The eye operation on His Majesty King Prajadhipok of Siam, in the early part of 1931, in the United States, has been so successful that there will be no need of a further operation, according to Dr. W. C. G. T. Chinn, medical director of Bangkok, who came to Vancouver recently aboard Canadian Pacific liner Empress of Japan.

A duck hunt in the private lake of the Chinese Emperor, the Forbidden City of Peking, with a Chinese general as host and armed soldiers as guides was the experience described by the Earl of Ossory on his arrival at Victoria recently from a press tour of Japan from a seven-month tour of China.

Paradise Valley, east of Lake Louise, in the Canadian Rockies, is the site selected for this year's summer camp of the Alpine Club of Canada, from July 18 to 31. Some of the most spectacular scenery in this region will be covered by the route including the unclimbed peak of Mount Eiffel, in the shadow of which their camp will be pitched.

Close on 250,000 people viewed the crack London, Midland and Scottish flyer "The Royal Scot" on its way to the Atlantic World Cup race, passed through Montreal, Ottawa, Toronto and Hamilton over Canadian Pacific lines. Re-assembled at the C. P. R. docks in Montreal, the "Scot" and the fast freighter Beaverdale, the Royal Scot passed through eastern Canada in a veritable triumph.

Inaugurating what Canadian railway officials believe will become the greatest rail movement in the history of the country, C. P. Riddell, chairman, Canadian Passenger Association, announced that commencing this month and continuing into June, Canadian railways will establish a rate of one cent a mile for coach travel by rail, in eastern and western Canada and return. This constitutes an all-time low in Canadian passenger fares, and sales commence from west coast May 26 up to and including June 8, and from eastern Canada May 31 up to and including June 15.

Three out of five Strathcona Memorial Fellowships in transportation given annually by the Alberta Provincial government have been awarded to Canadian Pacific Railway employees or sons of employees. There was a tie between 30 applicants for these fellowships. The three C. P. R. awards were to S. M. Gosage, stenographer in the office of the general manager, eastern district; P. E. St. John, son of J. F. Savage, general superintendent, Quebec district; and Robert A. Emerson, son of B. H. Emerson, agent at Morden, Manitoba.

Alberta Automobile Financial Responsibility Act

EFFECTIVE JUNE 1st, 1933

Synopsis of certain sections of the revised Act dealing with financial responsibility of owners and drivers.

"Failure of a Driver or Owner of an Automobile to pay a judgment rendered by any court in Canada for damages causing the death or injury of any person or on account of damage to property in excess of \$100.00 caused by the operation of a motor vehicle results in the cancellation of the license of those held responsible until the judgment is settled, and evidence furnished to the Minister that such owner or driver carries adequate insurance or is otherwise in a position to promptly pay any future damage sustained or damage to the public by the operation of motor vehicle. Evidence of financial responsibility shall be as follows:

1. A written certificate or certificates of an insurance company that has issued a policy to such owner or driver;
2. A bond from a guaranty insurance or surety company duly authorized to carry on business in the province, the bond to be made payable to the Provincial Treasurer;
3. Certificate of the Provincial Treasurer that such owner or driver has deposited a sum or security for money in the amount or value of \$11,000.00 for each motor vehicle registered under the name of such person.

"Any owner or driver who has been involved in an accident and who has failed to satisfy a judgment for damages recovered against him must lose his license until he pays that judgment and satisfies the Minister that he is financially responsible for future accidents to the amount of \$1,000.00 property damage and \$5,000.00 damage to one person, or \$10,000.00 to all persons injured in an accident."

Automobile policies in one of our Companies afford the only reasonable means of escape from the penalties of the Act.

WORLD HAPPENINGS BRIEFLY TOLD

Two days were all that was necessary for the people of Ontario to absorb completely an issue of \$25,000,000 provincial bonds.

It is estimated Chinese lost 50,000 men and the Japanese 10,000 in the intermittent warfare in North China, Manchuria and Jehol during the past 20 months.

Single workless from Edmonton and Calgary have gone to British Columbia to construct airports under the unemployed relief scheme of the Dominion Government.

Since the beginning of the current crop year, August 1, 1932, Canada's exports of wheat at \$7,000,000 bushels in excess of the figures for the corresponding period last year.

Immigration to Canada for the first four months of 1932 totalled 4,162, a decline of 28 per cent from the same period a year ago, according to figures issued by the Department of Immigration, at Ottawa.

Lieut.-Col. P. R. Shields, Calgary, was elected vice-president for western Canada at the Canadian Army Service Corps annual meeting at Ottawa, Lieut.-Col. F. Hyndman, Vancouver, was chosen western representative on the reserve of officers.

Montreal celebrated the centenary of the foundation of the city council with the unveiling of a plaque to the memory of Jacques Viger, Montreal's first mayor, and a ceremonial meeting of the members of the city council.

The King has approved the appointment of Lord Brabourne, distinguished barrister, as governor of Bombay in succession to Sir Frederick Hugh Sykes whose term of office expires in December. Sir Frederick has occupied the post since 1928.

The Canadian butter trade has more to fear from over-production of butter for the Canadian market than it has from imports of butter from New Zealand, Hon. H. H. Stevens, Federal Minister of Trade and Commerce, told a delegation from the Okanagan Valley Co-Operative Creamery Association.

Seeking Market In Canada

Bermuda Agriculturists Investigating Result Of Recent Vegetable Shipments

Inauguration of a regular service of vessels between Bermuda and Quebec city is fore-shadowed by W. R. Evans, assistant director of agriculture in Bermuda, who came to study the results of a recent experiment in the shipment of potatoes and celery on the S.S. Chomeday from Bermuda to the food markets of the ancient capital.

The cargo of the Chomeday was the first consignment of Bermudan vegetable products ever unloaded at Quebec.

According to Mr. Evans, Bermudan's vegetable season dovetails that of Canada.

Old Books Again Used

Bible and Prayer Book First Used In Australia In 1788

The first Bible and Prayer Book taken into Australia were used at the recent anniversary service in St. Philip's Church, Sydney. The books were carried by the Rev. Richard Johnson when he landed, 145 years ago. Mr. Johnson was the first chaplain of the settlement founded in Sydney Cove by the First Fleet bringing settlers to the new continent. Both books bear the inscription "Botany Bay, 1788," but as the sailing of the fleet was delayed they were first used in Australia on January 27, 1788. Ten years later they narrowly escaped destruction in a fire which burned down the first church.

Horse Stealing Revived
Horse stealing is not a lost art, according to James Charlton, who has requested authorities to trace twenty horses missing from his 4,000 acre ranch on the Saskatchewan-United States boundary. An intensive search of the huge range was made for 100 missing horses, but only 80 were found.

Horse Water For Sale

A unique service is offered by Mid-dlesborough, England. It is the only authority in Britain to sell hot water. Householders buy hot water for the family bath night at a halfpenny a bucket.

Robert Louis Stevenson invoked the easy flow of his thoughts by playing the piccolo flute.

W. N. U. 1932

Many Acres Under Glass

English Seed Valuable Market For Hothouse Fruits and Flowers

The fact that every tropical fruit and flower can be grown in Britain under glass is beginning to be appreciated and acted upon. Towns of glass are springing up, and experts estimate that there is a market value of £30,000,000 open to the enterprise.

Tomatoes, cucumbers, grapes, mushrooms, early strawberries, and raspberries are the chief fruits cultivated at present, but there is no reason why others should not be added to the list.

The largest glass-house area in Britain is in the Lea Valley where 1,500 acres are under glass. There are now more than forty-four miles of greenhouses in the sheltered part of the South Downs near Worthing, and a new enterprise has been formed to exploit the Worthing hothouse grape industry. The aim is to put 100 acres under glass, employ 600 men and get an output of a quarter of a million pounds of grapes a year. Other areas where hothouses have been erected are the Holland division of Lincolnshire and the marshland district of Norfolk. The figure of £3,000,000 is mentioned as the fresh capital recently put into this promising industry, which incidentally gives work to many men who are not gardeners.

Largest Electric Sign

Carries Name Of Founder Of German Dyre Trust

Leverkusen, Germany, claims that its new electric sign is the largest in the world. It has been put up between two chimneys of the German Dyre Trust, which are four hundred feet tall and stand nearly two hundred feet apart. In letters nearly forty feet deep a name has been arranged vertically and horizontally, the central letter serving for both. The whole is enclosed in a circle two hundred feet in diameter. Two thousand electric lamps are used. The name is that of the founder of the trust.

ALICE IN WONDERLAND JUMPER FROCK WITH BASQUE BODICE

French blouson made the original. The gimpine is white dimly spotted in orange-yellow.

Don't you adore the way the bodice of the dress fastens at the sides? The bodices are all orange-red shade, inverted pleats providing the necessary width to the skirt?

It's so simple to make it and so decidedly individual. It will cost you next to nothing.

Size No. 44 is designed for sizes 8, 10, 12 and 14 years. Size 10 requires 1½ yards of 39-inch material for dress with 1½ yards of 35-inch material for the bodice.

It's very smart in tweedy-linen in yellow and cocoa brown with the guimpe of plain yellow organdie.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Convalescent Homes

Plan Would Greatly Reduce Hospital Expenditure In Ontario

Establishment of convalescent homes throughout Ontario would reduce hospital expenditures and at the same time benefit patients, Hon. Dr. H. A. Bruce, Lieutenant-Governor of Ontario, told the Ontario Medical Association.

Adoption of the plan would reduce the present hospital population by 30 to 40 per cent, he said, and would postpone for many years the expenditure of large sums of public money on new institutions.

"Hospital care is imposing a heavy charge upon the people," said his honor. "The per diem cost in modern hospitals is due to a large extent to modern facilities such as X-ray, operating equipment, and the services of a trained staff. These are required for one seriously ill but when a patient has ceased to be acutely ill he or she can be cared for equally well in a convalescent home in the country, preferably on a small farm. Patients would have the advantage of country air and could be given light employment."

Recipes For This Week

(By Betty Barclay)

FRUIT CARAMELS

1 cup figs.
1 cup seeded raisins.
1 tablespoon candied orange peel.
1 cup dried dates.
1 cup walnut meats.
2 to 4 tablespoons orange juice.
Steam fruit for 20 minutes. Cool and put through food chopper with walnuts. Moisten with orange juice until of right consistency to make into small balls or squares.

STRAWBERRY TAPIOCA FLAMINGO

1 quart fresh strawberries, hulled.
1 cup sugar.
½ cup quick-cooking tapioca.
½ teaspoon salt.
2½ cups boiling water.
2 cups strawberry juice, drained from berries.
½ cup cream, whipped.
Crush strawberries slightly, add sugar, and let stand 30 minutes or longer. Add quick-cooking tapioca and water, and cook in double boiler 15 minutes, or until tapioca is clear, stirring frequently. Add strawberry juice to tapioca mixture. Chill. Pour ¼ of this mixture into parfait glasses. Fold cream into remaining tapioca mixture and fill glasses. Chill. Just before serving, top with crushed strawberries. Serves 8.

Close Mounted Police Posts

Reported That Three Posts In North To Be Abandoned

Three R.C.M.P. posts in the far north will be closed under an economy reorganization plan, according to Major-General J. H. MacBrien, commissioner of the force.

The posts to be closed are at Liard, Hay River, and Wrigley. It is planned to handle the Hay River post from Providence, while Simpson will provide patrols to the Liard district and Wrigley.

General MacBrien plans to go to Edmonton in August for a trip of inspection as far north as Aklavik.

A new material for dental plates is said to have unusual strength, to retain its form indefinitely, and to have the natural colour of skin tissue.

Soviet exports from Black Sea ports continue to decline.

Sales of automobiles in Germany continues to outrun those of a year ago.

ACTRESS POPE'S KIN

SUNDAY SCHOOL LESSON

JUNE 18

JESUS RISES FROM THE DEAD

Golden Text: "He is risen."—Mark 16:6.

Lesson: Mark 16:1-20.

Devotional Reading: Psalm 16.

Explanation and Comments:

He is risen, verse 1.—It was after sunset on Saturday when the Jewish Sabbath was over, that three women, Mary Magdalene, and Mary the mother of James, and Salome, bought spiken for the anointing of the body of Jesus. His body had lain in the tomb three days according to Jewish reckoning, for part of day was spoken of as a whole day. Nicodemus had brought a hundred pounds of myrra, and myrra at the time of the entombment, John 19:39, 40, but of this the women were evidently not aware.

It was very early on the first day of the week, that they came to the tomb. (With the exception of the Sabbath, the Jews gave no names to the days of the week, but called Sunday the first day, Monday the second, and so on.) It was when the sun was risen, Mark adds.

"What is this?" It has been suggested that "what" has dropped out of Mark's words and that he wrote "when" instead of "what." Luke says "when" "it was yet dark."

Looking up, suggestive of heavy heart and downcast eyes on the way that they saw, they saw that the great stone was rolled away.

They entered the tomb and saw a young man clad in a white robe sitting there, and they were amazed, Luke says they were affrighted, and bowed their faces to the earth, Luke 24:4.

"The women came to the sepulchre and found an angel? Not at all; they saw a young man sitting! We are told in the Gospels to account to the other Gospels in which they account to us angels, that we may never have noted Mark's expression. But how much simpler it makes the story! Not the women, but the angel, said to them in their place. They went out to the tomb in the half-darkness, casting furtive glances about to make sure no one is watching. On the way they hold a whistled consultation as to what shall be done. Finally the stone—only to find it already moved. Very cautiously they venture up to the open doorway and peer in. There is a kind of angel, but a different kind, dressed in white, jumps to his feet, and starts to explain the inevitable thing, they scream and run, giving no attention to the explanation. He calls after them, "The Holy Ghost." Miraculous!

"Be not amazed," the young man cried: "Ye seek Jesus the Nazarene, who hath been crucified: He is risen: He is not here."

And with Him arose, and life and strength.

He rose!

Men said, "Not Christ but Death died yesterday!"

And joy and truth and all things virtue.

Rose when He rose.

Drive In and Park

Railway Registers Increase

Minister Of Railways Sees Signs Of Improved Conditions

It was only \$2,500—one grain of sand on the seashore—but it brought a wide grin of satisfaction to the face of Hon. R. J. Manion, Minister of Railways. That sum represented the gain in the revenues of the Canadian National Railways for the 10-day period ending May 31 over the preceding 10 days.

It was the second time since July, 1929, and the first since October, 1931, the revenues of the government road showed an increase and was constructed by Dr. MacBrien as another sign that old man depression finally was being tossed for a fall.

Blind 'Phone Operators

About 100 of the blind ex-service men in St. Dunstan's Institute for the Blind hold positions as telephone operators. A. St. Dunstan's man, Thomas Duncan, has been appointed telephonist at the new Hull electricality showrooms.

A new war tank has been developed in England that can run on water at six miles an hour and 42 miles.

It's hard to imagine what it will sound and smell like between shows when each of the 400 cars tries to get out first; or how the noisy late-comers will be received.—St. Thomas Times-Journal.

Dwarf Had Giant's Courage

Attempted To Walk From Italy To North Pole Alone

Giant's courage was possessed by Anton Gittinger, a dwarf of Milan, Italy, so he decided to walk to the North Pole alone. He went to Norway and got a Polar outfit and dogs, then went to Greenland. Eventually his supplies gave out and he killed and ate his dogs only the last one escaping by running away. He was left stranded on the icefields starving to death. There he was found by the explorer Rasmussen, lying in the snow and too weak to walk. The exploring party adopted the tiny man and nursed him back to life. They kept him with them for the two years of their exploration.

At present he is planning a walking trip to Africa, and may later set off for the Himalayas.

That its "planes have flown 10,000 miles with only five accidents involving injury to passengers."

"Ay, ay, Sir—and it looks like being a long job!"—The Humorist.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Had Swiss System

When an inspector called recently at a school in Sofia, Bulgaria, he was impressed with the accuracy of the pupils. Every time the teacher asked a question every child raised his hand and the answers always were right. The inspector congratulated the teacher. Upset by his congratulations she confessed she had devised a "system," and had taught all her pupils to raise their right hand if they knew the answers and their left hand when they did not. She called on only those with right hands raised.

Work of Daughters Of Empire

Distribution Of Milk To Under-Nourished Children One Of Many Efforts

If the Independent Order of the Daughters of the Empire did no other work in the past year, its contribution to the well-being of the Dominion in supply of milk to underprivileged and under-nourished children would in itself constitute a worthy record.

"It would be impossible to estimate even the quantity or the sum to which this would run," the national convenor of child welfare, Mrs. A. U. de Pencier, of Vancouver, said in an interview at Edmonton. "But it is safe to say that nearly every chapter of the Dominion has participated in this form of relief work," she added.

"In one instance in British Columbia, \$227 was spent by three chapters; one of these gave 1,900 quarts a month to school children. Of chapters heard from in the province of Quebec, \$2,254 was expended, on a chapter spending \$500. In Nova Scotia, there was record of \$1,447 having been spent on milk.

"Clinics are supported by many centres by chapters, and expenses for vaccination and dental work borne where parents are unable to pay for these health services. Preventorium, sanitorium and solarium maintenance and summer camps are other noteworthy efforts to which the order has devoted itself in the past year," Mrs. de Pencier stated.

Thirty-five cots are maintained in the preventorium in Toronto, and Saskatchewan chapters donated some \$1,000 to preventorium work and have supported innumerable clinics. Seven Vancouver chapters have assisted the solarium on Vancouver Island, supplying layettes and other clothing and boots and shoes.

"Hot lunches and hospital cars are other phases of child welfare endeavors which have held the attention of chapters across the Dominion during the past 12 months," Mrs. de Pencier concluded.

Mrs. J. H. Holmes, of Saskatoon, a vice-president of the national executive of the Independent Order of Daughters of the Empire, and former provincial president of Saskatchewan, had the distinction of being the only member to receive a national life membership this year.

Ratification of this life membership was made at a session of the annual chapter meeting at Edmonton.

The Lighter Side Of Life

A Little Humor Helps To Make Life Better and Brighter

It is not recorded who first said, "A little nonsense now and then is relished by the best of men." But who ever it was, he might with equal accuracy have observed that a great deal of nonsense is relished at any time by most men. In business or pleasure, a laugh is as hungry sought as anything else that may be on the programme. The business of living is involved in so many hardships and worries that the most trivial nonsense helps to make life brighter and better. It has been said that a sense of humor is a saving grace; but no two people seem to have the same sense of humor. Perhaps the best is that which enables one to see enough of the funny side of the experiences of life; tragic as some of them are, to laugh his way through difficulties and to perceive the laughing side of the thing when fate drives him through the briars.—Moncton Transcript.

Intentions Were Good

Jones was at a dinner party. He was shy and could never summon up courage to speak because of his inability to say anything neat. All the evening he had been trying to think of something nice to say to his hostess. At last he thought he saw his chance.

"What a small appetite you have, Mr. Jones," said his charming hostess with a smile.

"To sit next to you," he replied gallantly, "would cause any man to lose his appetite."

HER HAND FELT DEAD**Helpless With Rheumatism**

At one time she thought she could not use her right hand. But "a blessing" came in the form of Kruschen Salts—and her right again.

"I was sure in a bad state," she writes. "In fact, I could not do my housework. It was so bad with rheumatism in my arms and hands I could not sleep at nights, and had to get up and heat water to ease my pain and stiffness. I took all kinds of remedies—nothing helped. It was plastered—it but it was still there. I thought I would lose the use of my right hand. I could not hold anything. No one could sew a button on. My arms were dead all the time. I tried to try Kruschen's help again. I kept on taking it, and am so thankful for the blessings I have received in Kruschen's name. Now I sleep all night—thanks to Kruschen's help and relief." —(Mrs.) J. H.

The six salts in Kruschen stimulate the mind and kidneys to health; regular action assures them to get rid of the excess uric acid which is the cause of all rheumatic suffering. When poisonous uric acid goes with its deposits of needle-pointed crystals, there is no doubt about those aches and pains going too!

Authorities Have Real Worry**What To Do With Doukhobors When Released Is Question**

Authorities in British Columbia responsible for the wholesale imprisonment of more than 600 Doukhobors as a result of nude parades and similar demonstrations last year are beginning to ponder the problem of what to do with the fanatics when they are released from their penal colony on Piers Island.

In most cases the Doukhobors will return to their former homes to find that their lands have passed to other hands; their cultivated fields will either be covered with weeds or will be under the control of strangers. What redress will they have, if any?

Provincial officials are wondering whether the problem caused by this situation will not be just as difficult to solve as the original one. They have some hope for the young Doukhobors who were separately cared for at industrial homes and who have been gradually returned to Doukhobor families who pledged themselves to subscribe to Canadian laws, but they are not so sanguine about the older Doukhobors. They realize that the mature members of the fanatic sons of freedom band are not likely to show a different attitude when they are liberated.

Describing the general attitude of the Doukhobors, Judge Forin, who has made a study of the subject, pointed out that the members of the cult are mostly pagans and consider Christians inferior. "They duped us and deceived us in a way that is really remarkable when they sought entry into Canada," he said.

"The cumulative effect of them having adopted doctrines of various religions is that they have no places of worship, desire isolation, condemn oaths, refuse to bear arms, consider their leaders divine and cling to the dangerous doctrine that they have a secret and mysterious knowledge in no way accessible to outsiders."

Judge Forin described their leaders as having "driving executive minds."

"It is a blot on our civilization that we have to isolate them, but what could we do otherwise?" he asked, pointing out that the nude parades had been carefully organized to "frighten" Canadians into leaving the seat alone.

In tracing the early history of the Doukhobors and the many religions from which they adopted doctrines and beliefs, Judge Forin stated that inverted application of the scriptures as made by Leo Tolstoy was adopted by the late Peter Veregin as teaching of Tolstoy.

A Lengthy Law Suit

A lawsuit which lasted 900 years has been settled in the court of appeal in London. It concerned a common man to which two Italian parishes, Casavatore and Vicalvi, both laid claim. Neither would budge in its stand until recently, when a compromise was effected.

NERVOUS WOMEN**Take Lydia E. Pinkham's Vegetable Compound**

"I am so nervous it seems as though I should fly." "My nerves are all edge." "I wish I could sleep." How often have we heard these expressions? How many times have we been tired and run-down that her nerves can't stand it?

No woman should allow herself to drift into this condition if she can help herself. She should take Lydia E. Pinkham's Vegetable Compound a trial. For many years it has been a wonderful tonic to give them renewed strength.

"90 out of every 100 women who report to me are benefited by this medicine. Buy a bottle from your druggist today . . . and watch the results."

W. N. U. 1998

Low Wheat Prices**Future Recovery Of Grain Prices Uncertain Factor**

No silver lining to the low wheat cloud which has blighted wheat growers for the past five years could be seen by Dr. Holbrook working international wheat expert of Stanford University, when he read a paper on the future of grain prices to the agriculture section of the Pacific Science Congress.

Cited three factors which are preventing recovery of world wheat prices:

1. The surplus which has depressed prices for five years, due to the record crop of 1928, still exists.

2. World acreage at present is adequate to supply needs.

3. There is no incentive to restrict acreage in Europe due to artificial aids to prices sponsored by governments.

Where an abnormally large crop is not followed by an equally abnormal one, restrictions of acreage is the only preventative of a long-continued price depression. Dr. Working said. Since the large crop of 1928, world acreage has increased and made conditions worse instead of better.

The economic slump is also a contributing factor in low wheat prices, the speaker declared, but unless existing stocks are disposed of, a return of prosperity will not benefit the farmer.

The reappearance of Russia as a large-scale wheat exporting country has added to the low wheat prices still more, he said.

Next to over-production, the speaker blamed the high tariffs and government fixing of prices at an artificially high level in Europe for the plight of the grain growers. If these conditions are not remedied, he said, the problem becomes, not an international matter as at present, but a domestic one in which each country will have to adjust individually its production to its needs.

Dr. Carl L. Alberg, of Stanford University, also speaking on wheat, explained the price depression as due to the "inelasticity of the human stomach." Consumption of wheat does not increase appreciably with a drop in price, he said, and therefore over-supplies become redundant.

Starting Hazardous Trip**Medical Students Exploring James Bay District Without Guides**

Allan Critch, Vancouver, and Paul Firth of Port Rowan, Ont., medical students at University of Toronto, have started without guides or other assistance, an exploration of the semi-charted territory between the height of land and the Albany River, eastward to James Bay.

From Nakina, a 22-foot canoe loaded with enough supplies to last several months, they plan to set forth through a series of minor lakes and rivers toward the long, tortuous reaches of the ominously named Drowning River.

After a brief stay at Fort Albany, the students hope to proceed southward to the east coast of James Bay to Moose Factory and thence to Moose, northern terminus of the Temiskaming and Northern Ontario Railway.

Could Not Blame Him**Small Boy Wanted Man's Hair Cut And Got It**

With the help of police, "Buddy" Young, seven, of Chicago, got his hair cut all right.

He disappeared after his mother, Mrs. Louis Young, took him to a shop where she has her own beauty work done, and was found some time later by a policeman looking in the window of a man's barber shop.

"I didn't," said the boy, "want to have my hair cut in any woman's barber shop."

As one man to another, the policeman fixed him up by giving him the money for the hair cut. Then he noted his mother.

No Men Employed**Public Accountant's Firm In London Composed Entirely Of Women**

"Homersham and Co., Public Accountants," of London, England, is composed entirely of women and will not employ a man. Most of the firm's work is for public utility companies. Miss M. M. Homersham founded it and became England's first woman public auditor. Miss Gladys Cowtan, aged 25, is a member and the youngest woman holder of the Society of Incorporated Accountants' Certificate of Merit.

Vegetable oil tanks are being built in Vancouver harbor to provide facilities for unloading oils brought from the Orient and South Seas.

Plan Long Flight**Sir Alan Cobham and Companions May Attempt Non Stop Trip To Australia**

Famous Sir Alan Cobham and Squadron Leader Helmore are proceeding methodically with the flying trials of a new single-engined monoplane in which later this year they may attempt to fly 6,000 miles non-stop, probably to Australia. They plan to have the plane refueled in flight from "tasker" aircraft which will ascend to meet it from five or six aerodromes along the way. The need to carry on enough fuel load of fuel at the start is avoided.

For ordinary commercial use the aeroplane is intended to carry pilot, four or five passengers and luggage. Equipped for the proposed long distance flight it will have seats for the two pilots only, the remainder of the disposable load being represented by approximately 280 gallons of fuel sufficient for about 26 hours' cruising at 130 to 140 miles per hour. Power is derived from a single 245 horse power Armstrong Siddeley "Lynx" air-cooled engine. A Townend ring cowling around the engine is responsible for a gain of 15 miles per hour over the speed attained with an uncowled engine.

If Cobham and Helmore make for Australia and have good luck, they should reach the Australian mainland from England in less than four days.

New Rainproof Fabric**Almost As Light As Silk and Resists Heaviest Weather**

A rainproof material possessed of remarkable qualities has been discovered in Lancashire. The new material which is made up into hats, coats and gloves, is between the ordinary weatherproof cloth and rubber finished goods. It is capable of resisting the heaviest weather; it is very light and has a silkier finish. Although it can be made almost as light as silk, it has the advantage of being less susceptible to tearing than the ordinary light mackintosh.

The manufacturer began at Burnley to meet the needs of Sir Wilfred Grenfell in his medical and scientific work in Labrador. Since then the material was taken up by the British expedition to Everest. All the suits of the members of the Everest party, their tents, and the capes of the native porters were made from the new material.

Women In Public Life**Do Not Neglect Their Homes To Engage In Public Welfare, Says Speaker**

"Are women really making an advance?" was the question asked by Mrs. W. F. C. Brown, Regina, national president of the Federated Women's Institutes of Canada, in her presidential address at the joint session of the F.W.I.C. and of the Manitoba Women's Institutes in Winnipeg.

"The scoffers assume women who are interested in public welfare neglect their homes, but that is not so," the speaker said, for they are the very women who are equally conscientious in their home service, with a more efficient method and management."

There has been real progress in regard to the actual home, Mrs. Cameron declared, but in spite of this new condition, this comparative freedom from constant toil, many women are still willing to be engrossed entirely in domestic details.

Had Thrilling Adventure**Two Youths Make Bicycle Trip From South Africa To England**

A thrilling adventure was completed by two young men, Richard S. Kockler, a German, and Kenneth D. Poulton, a South African. They traveled all the way from Johannesburg to London on bicycles fitted with engines of only one and a quarter horse power. They travelled 15,000 miles by way of Nairobi, Khartoum, Cairo, Istanbul, Vienna, Berlin, and Amsterdam to London. On several parts of their route they travelled over paths through the bush where no motor-cycle or any other kind of mechanical transport had ever travelled before.

Only Austrian Ship Afloat

The S.S. Wein of 4,000 tons claims the distinction of being the only ship afloat belonging to Austria. It sails between Alexandria and London, carrying cotton seed, oil cake, and onions. The Austrian Legation at London, England, states that it knows of no other vessel owned by Austria, now in commission.

Summer railway excursion rates in Britain have been reduced to two cents a mile.

Mysteries Of The Sea**Every Coast Has Its Story Of Vanished Ships**

The "Zebina" was a sailing ship, and during the war was running between England and France under Government commission. One day she was found drifting derelict in the English Channel, a mile or two from Cherbourg.

She was not, obviously, a derelict. All her sails were properly set, and she was in first-class condition. But the way she was sailing prompted investigation and it was discovered that there was not a living soul on board. On the cabin table was a meal ready for the eating; everything was in perfect order; there were no signs of a fight, or anything to account for the absence of master and men.

Yet they had all vanished completely, leaving no trace. Nothing has ever been heard of them since, nor the mystery of their disappearance explained.

They may have been victims of some enemy craft. That is the presumption. But the fact has never been established.

Another mystery of this character was the disappearance of the crew of the German fishing-boat "Scharnhorst," which one winter's day set out from its home port on a trip to the White Sea. It never returned. A long time afterwards, the vessel was found, locked in a mass of snow and ice, by the crew of a Norwegian vessel. There was nothing wrong with the ship, but the crew had vanished. Their fate is still a mystery.

The mystery of the American collier "Cyclops," whose disappearance during the war was never explained, is rapidly attaining the character of a sea legend among American sailing men. She vanished an hour or two after "speaking" with another vessel flying the American flag, in a sea like a millipond. Not a single spar was ever found—noting to give a hint of what happened to ship and crew.

Now and again on moonlit nights American seamen, who knew her well have helped build up the legend concerning her by "seeing" her well-known lines clearly outlined for a moment or two on the horizon.

Every coast has its own story of some ship that has sailed away never to return, vanishing entirely with any word ever coming of its fate; and of strange sea-ships which afterwards haunt the waves. They are being added to, even in these days of enlightenment.

THE RHYMING OPTIMIST

By Alice Michie

CONTENTMENT

What is there to regret or desire in this green valley where we dwell today?

What ash of burnt-out passion's fire Can blow on any wind down this calm way?

What is there of remembrance that could bring

The greatest pang for pleasures not to be

Or cast its shadow on this ardent spring.

To veil the glowing hue of field and trees?

Here is the region for which all men long,

Although by devious routes they wonder far;

The home of peace is here, the home of song,

And beauty tranquil as the evening star.

For some green slopes with flowered overgrown,

A king might gladly leave his crown, his throne.

Voltaire could never begin work unless there was an exact dozen of pencils with sharpened points at his side.

Automobiles are replacing pack animals and horse-drawn vehicles in Persia, where there are now 10,000 miles of motor roads.

It requires about 55 different machines to produce wet shoe soles.

School children of Scotland will have a course in telephoning.

SOURED ON THE WORLD?—THAT'S LIVER**Wake up your Liver Bile**

—No Calomel necessary

May people who feel sour, sluggish and edgy, mineral water, lemonade or any other drink will not only cure the bowel and improve the liver.

Start your liver power to wake up your liver bile into your bowels. Get your stomach and intestines working as they should, once more.

Castor Oil Liver Pill will soon fit you up. Purify vegetable oil, refined, refined, refined by them by name. Refuse substitutes. See all at druggists.

THE TIRE that TAUGHT THRIFT to THOUSANDS!

GEAT the most for your money—buy Firestone—the tire that gives you 25 to 40% longer tire life at no extra cost. Think of it—extra strength—extra safety—extra mileage and only in Firestone can you get all these features—

1 TWO EXTRA CORD PLIES UNDER THE TREAD make the tire safe at any speed.

2 CUM-DIPPED CORD BODY with 55% longer flexing life.

3 BALANCED CONSTRUCTION holds the tire on the road at high speeds.

4 SILENT, SAFETY TREAD made wider, deeper and gives 25% more non-skid life.

5 AMAZING NEW GUARANTEED ANTEE protects you against blowouts; cuts, bruises and all other road hazards, except punctures for twelve months.

Replace worn tires.

World's Largest Dam

Immaculate Artificial Lake To Be Created In Nevada

Construction of the world's greatest dam was started in Nevada recently.

Without ceremony the pouring of concrete into the river bed foundation for Boulder Dam began. For more than two years this pouring—7,000,000 tons in all—will continue. Thus will rise a vast concrete structure, 730 feet from the foundation rock, and sufficiently high to raise the height of the Colorado 582 feet to create the greatest artificial lake man so far has set out to build.

August 1, 1935, is the date the dam will be finished. It will be 1,180 feet across and will require 5,500,000 barrels of cement in its construction.

Noisy Northern Lights

Aurora Borealis Makes Hissing Sound In Northern Skies

When the aurora borealis flings its gorgeous draperies across the northern Canadian sky it is said to be a sight that divides the world in wonder. Such as they are, they bring thoughts such as also will be the character of thy mind; for the soul is dyed by the thoughts. Dye it then with a continuous series of thoughts such as these: "Where a man can live there he can live well," for if he must live in a palace, he can also live well in a palace. —Marcus Antonius.

Who is there that sets himself the task of steadily watching his thoughts for the space of one hour, with the view of preserving his mind in a simple, humble, healthful condition, but will speedily discern in the self-reflecting, self-admiring emotions a state as much opposed to simplicity and humility as night is to day.—M. A. Kelly.

By subjecting it to a simple imprinting process wood has been made bullet-proof, gun-proof and water-proof in Germany.

Second-hand car Salesman (on trial ground)—"This car is sound in every part."

Prospective Buyer—"So I hear."

"Make a sentence containing the word 'omnivorous'."

"Omnivorous happy as when I'm playing football."

Angler (to rival proudly displaying catch): "Thank goodness, you've caught him. I'm tired of throwing the little bigger back."

To restrict imports of fax the German government will pay a subsidy to German flax growers.

Personal and Local

Mrs. T. Blower and Miss M. Griffiths visited Mrs. Montague Wilson at Arrow Lakes during the past week.

West Coleman Co-Eds thank all who kindly contributed money to their softball team.

Mrs. J. C. Rogers returned last week to South Slocan, after visiting her daughter, Mrs. W. Hoggan, and son.

J. D. Moir returned to Constance, Saskatchewan, on Wednesday, after spending a week with his daughter, Mrs. H. T. Hallwell.

Watch daily bulletin, to be issued by Empire Life and Journal, for particulars of wrestling match to be held in Coleman on June 28.

A concrete block and stone wall will probably be built on the north side of the United church, to connect with the wall erected at the town hall. This will add greatly to the general appearance of the corner.

W. Antel intends moving a house from Second street to Sixth street, where he has purchased a corner lot. He intends moving his family in from the North Fork in August, in time to attend school.

Mrs. Norman Brown, and daughter Evelyn, of Springhill, Nova Scotia, are visiting Mr. and Mrs. Frank Barrington. On Sunday they motored to Lethbridge to visit relatives. It is the first time they have met for many years.

A very enjoyable shower was held in honor of Mrs. Vangotsimov, (nee Miss Anna McLeod) at the home of Mr. and Mrs. Hector McDonald, on Monday evening. Many nice presents were showered on the guest of honor by her friends.

J. A. McLeod won the first prize in the men's first flight in the golf tournament at Blairmore. It was a fine case of brushes and he states it was a complete surprise to win. During the tournament Mr. and Mrs. McLeod extended their hospitality to quite a number of the players.

ANNOUNCEMENT
Dr. A. E. Shore, of Drs. Gunn, Hackney & Shore, Calgary, will be at the office of Dr. R. E. Stewart, Blairmore, Friday afternoon, June 16th, after 2.30.

Anyone wishing to consult him with regard to eye, ear, nose or throat or to be fitted with glasses, please make an appointment with Dr. Stewart.

ANNOUNCEMENT

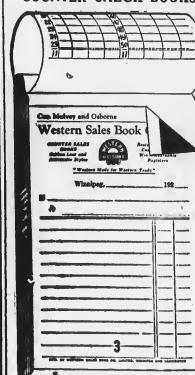

Mr. Melville Anderson, of Anderson & McLean, sight specialists, Calgary announced his next visit to G. R. Powell's, Coleman, on

Tuesday, June 27th

20 years' experience and regular visits assure you of satisfaction in all optical work.

FOUND: During carnival, at white muffle. Owner may have same on paying for advt.—Journal.
